MAD GAMES PRESENTS "SPELLBOUND"

The first in a new generation of arcade adventure style games using a unique window menu system.

All command choices can be made by moving a pointing finger to the required choice on a menu, then selecting it by pressing space or fire. In this way quite complex commands can be built up easily using only three keys.

When this program loads it is set up for keyboard or joystick

change this using H and B to move the finger and press space when it points to the option, that you wish to use. The fire button can then be used to select your menu choice.

You are a Magic Knight, the hero of Finders Keepers. Your tutor Gimbal the Wizard has been trying out some very old spells to make his rice pudding taste nicer, unfortunately the scribes who translated the spells from very enicent English to slightly ancient English made some mistakes with the wording and Gimbal is in trouble

The spell sent Gimbal to the mythical Castle of Karn and dragged seven other people with him. As Gimbal, becomes trapped he projects a last faint message back to you across the time stream. I've taught you enough to rescue us all. Magic Knight, you are our only hope!! Clue: Red Herrings may be useful.
